3. Type an account name and then click the **Save New Account** button.

Manage Prepaid Accounts

Introduction

Prepaid accounts offer a convenient method of quickly purchasing documents and images by avoiding repetitious credit card entry during successive transactions. A prepaid account is an account funded through a credit card or cash (depending on what options are available at your government office). When you make a purchase, the prepaid account is used to complete the transaction in lieu of a credit card. For customers transacting multiple purchases per day, this provides a much more efficient means of conducting business and an effective method of tracking purchases made for multiple clients. For instance, if you are a professional searcher and have five clients for whom you clear titles, etc., you can set up five prepaid accounts - one for each client - to easily track the source of each of your transactions.

Creating A New Account

To set up a new prepaid account, click **Create New Account**. Once you've entered a description for your account, click **Save New Account**. Your list of prepaid accounts will then be refreshed and will include the new account.

Adding Funds To Your Accounts

Adding funds to your accounts is easy. Click **Add Funds** for any **active** account. You may then enter the amount you wish to add, referred to as the "recharge amount". Some limits may apply to the minimum or maximum recharge amount. Any imposed limits - which are based on the maximum allowable subtotal in your shopping cart, the maximum recharge amount, or the minimum recharge amount - will be displayed to you during this process. Once you've selected your amount, click **Add to Shopping Cart**. The prepaid account "recharge" will appear as a line item in your shopping cart.
